Assignment no 01

Q1: How and where is Facebook using Machine Learning to improve user experience?

Ans : Machine Learning is essential to Facebook. Facebook is currently having one of the best machine learning algorithms in place. It helps people discover new content and content with the stories they care the most about. Their applied machine learning researchers and engineers develop machine learning algorithms that rank feeds , ads and search results and create new text understanding algorithms that keep spam and misleading content at bay.

Q2: How do you think deep learning can change the world and do wonders?

Ans : Deep Learning is a form of Machine Learning which turned in a form of Artificial Intelligence. Deep learning gives us many things like even told us how to text and this is also Artificial Intelligence For Example we are now many technologies they can our life easier like first we just use Pc then Pc and internet then we more grow up we get Social Mobile E- Cloud and Now we are AI and IOT that is all AI. AI is the new Electricity transformed everything. We are Living in AI and Deep Learning Environment. Deep learning still helps us to get launch new technologies and change this world.

Q3: What is your dream AI project that can become into reality and can have a commercial value?

Ans : I want to make a robot that is totally based on AI and Yes it can be a commercial value.
